

ARMINARIUM

YEAR: 2021. MATERIAL: BRONZE
DIMENSION: HIGH 93 X WIDTH 20 X DEPTH 25 CM

Armin's light shell: Essential God in the Romanian culture.
The protective uplift of the white light covering the creation and redemption pearl. A work dedicated to the grand historian Mircea Eliade. The original craft was built from cast iron, following ancient methods of iron crafting, by using coal, fire, air and water.

CERTIFICATE OF AUTHENTICITY

Daniel Pop

FĂURAR ART

METAL SCULPTURE WORKSHOP

A WORKSHOP THAT MEETS ALL THE ARTIST - SCULPTOR REQUIREMENTS

Metal sculptures, forged sculptures, artistic cast, architectural design

Craftshop on the outskirts of Madrid, with its occupational focus on forged artistry, a self-explanatory example being the creation of all ornamental wrought iron trimmings at the Spanish Royal House of Prince Felipe VI Royal Palace Moncloa, restaurative works in Royal Palace Granja de San Idelfonso Segovia and not only.

Starting year 1999, we have extended our craftsmanship by an additional focus into: Hand Forged Sculptures, Stainless Steel, Bronze and Weathering steel.

We moved our workshop to the traditional rich with history Romania, Northern Transylvania, Baia Mare city, where we currently base our work. All through these years, we brought our craft to a superior level of art, blending the traditional "blacksmithing" with the most modern perfect touches, giving our customers just about the best they can get.
